Where To Use

Hospitals	Athletic Facilities	Rest rooms	Health Care Facilities
Schools	Nursing Homes	Telephones	Garbage Can & Storage Areas
Offices	Restaurants	Bars	Floors, Walls, Tables, etc.

Dilutions

1-2 oz.. per gallon depending on soil load.

Directions

Master Blend Disinfectant #6 is designed to be diluted at 1-2 oz. per gallon through the Simoniz Master Blend Dilution Systems. The Master Blend systems are preset for a 2 oz. per gallon dilution for filling quarts and 1 oz. per gallon (wall mount unit) for the bucket fill. If a different dilution is desired, please see the instructions with the dispenser to determine the correct metering tip. (Portable Master Blend units are preset at 2 oz. per gallon). Simply attach the half gallon to the dispenser via the cap at the end of the draw tube (wall mount) or attach the portable unit directly on to the half gallon and fill either quarts or mop buckets. If using this product with another dispenser, use the appropriate tip for the desired dilution. (Please note, in order to use Master Blend products with other dispensers, part number C38CS4W must be attached on the pickup tube.)

Preclean extremely dirty areas and remove any obvious gross dirt. Dilute, based on the table above. Depending on the application, apply diluted solution with a mop, cloth, sponge or trigger sprayer. Wet all surfaces thoroughly and allow to remain wet for 10 minutes. Remove excess liquid. Prepare a fresh solution for each use.

To Disinfect toilet bowls – Flush toilet, add 1 oz.. of product directly into the bowl water. Swab bowl completely, including under the rim. Let stand 10 minutes, then flush. **HIV-1 (Aids Virus)** – The areas to be disinfected must be pre-cleaned of all blood and body fluids. Please read label instructions for use in HIV-1 disinfection.

It is a violation of federal law to use this product in a manner inconsistent with its labeling.
